* Gradient colors are used for very specific elements. Never used as backgrounds. The main use for plan designs must be using plain colors (200,400,800).

Type of assets

From less complex to full composition we have different elements:

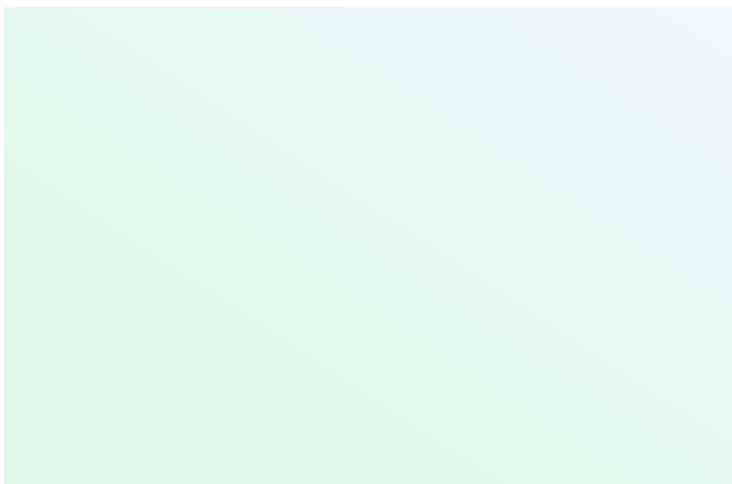

Composition
backgrounds

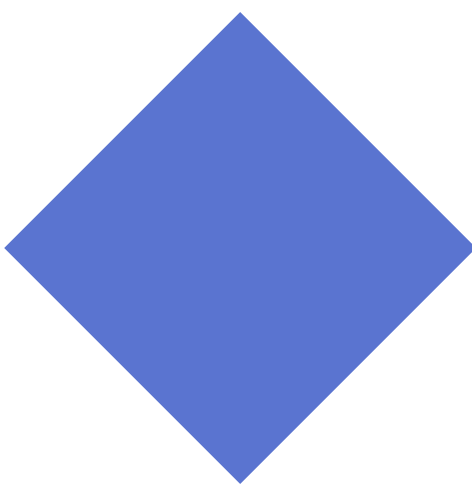

Composition

Isolated
elements

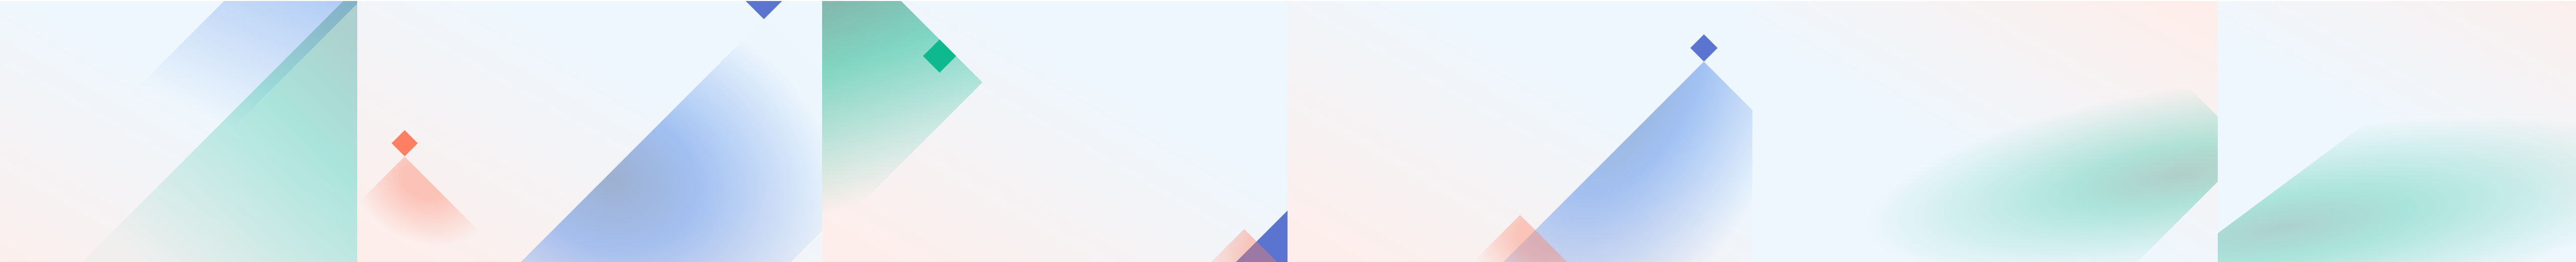

Plans

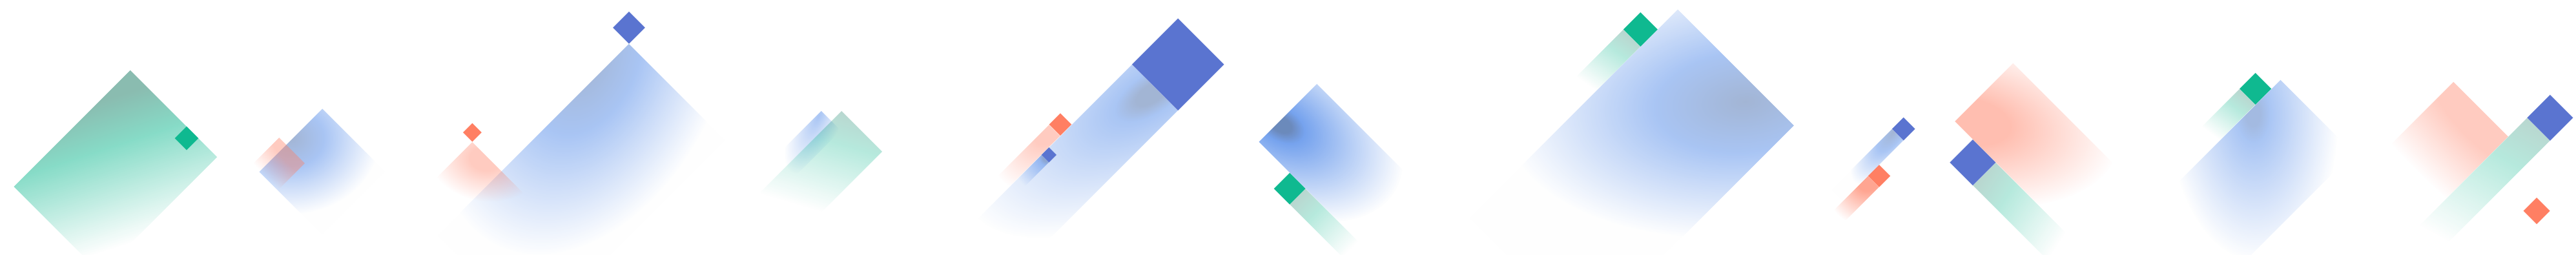

Compositions backgrounds

Can be used as a base for any new composition. The easiest way to create any design.

Compositions elements

If you need to have more control of the elements in your composition, this are elements that can be included anywhere

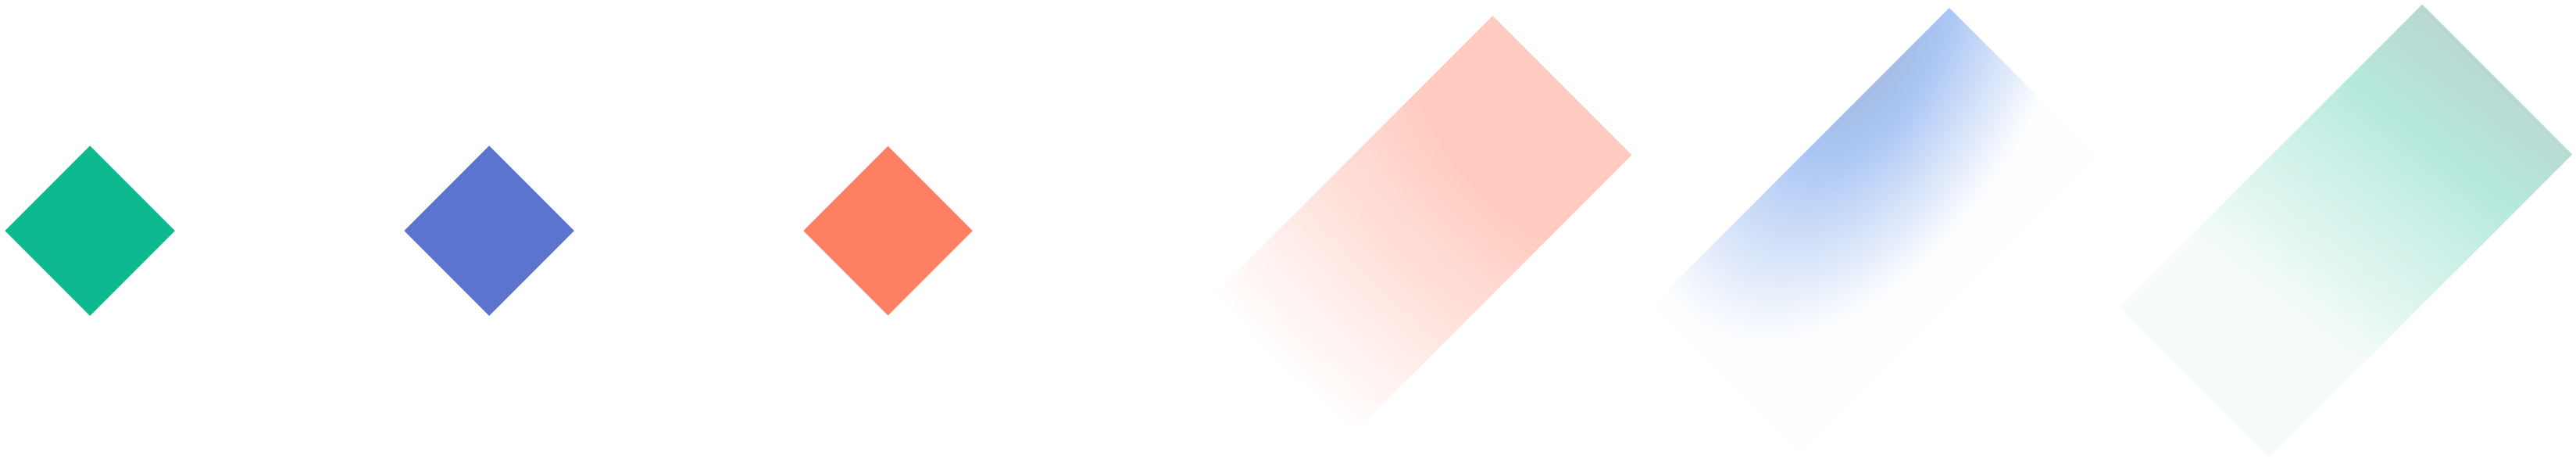

Gradient backgrounds

Can be useful when applied as a background on any composition and mixed with white backgrounds to create contrast

Isolated elements

The minimum expression of elements used in branded content.
This is perfect if you need maximum customization.

Plans

If you need to use assets related to a specific plan, this will be perfect if you don't want to get involved with colors. If you know what you are doing, just go straight to the colors section.
